

Re.: Loxeal Thread lockers, Thread sealant

The above Loxeal products, can be utilized for maximum pressures according to the following table:

- | | | |
|----------------------|--------------------------|--------------------|
| • Class of locking 1 | (low strength products) | up to 50 Bar |
| • Class of locking 2 | (mid strength products) | up to 80 / 120 Bar |
| • Class of locking 3 | (high strength products) | up to 250 Bar |

The above pressure rates are for reference only and dependent to threads gap.

The above pressure rates are referred to correct products application in compliance with Technical Data Sheets for each product, and the assembly shall not be subject to structural modification during the application process and after the handling time of the product.
